

On-Time Performance of Marketing Carriers (July 2024)

Legend

- X-Axis: Different marketing carriers operating in July 2024.
- Y-Axis: Average delay time in minutes..
- Bar Colors:
 - Red: Carrier delays
 - Sky Blue: Weather delays
 - Light Green: NAS delays (National Airspace System)
 - Yellow: Security delays
 - Light Blue: Late aircraft delays

Findings

- Overall Performance:

The analysis shows significant variability in delays among different carriers.
- Contributors to Delays:

Late Aircraft Delays account for a substantial portion of the overall delay times, indicating potential issues in scheduling and maintenance.

In contrast, NAS delays and weather-related delays represent relatively small proportions, while security delays are extremely low.
- Carrier Comparison:

Some carriers(such as DL) have significantly higher CARRIER_DELAY compared to other carriers, indicating potential operational inefficiencies that need to be addressed.
